DETAILED ACTION

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1- 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huang et al (US 6,277,168) in view of Bjorkman (US 4,268,306) Huang et al discloses a method for direct metal making by microwave energy but does not disclose recovering mercury but Bjorkman discloses that mercury may be removed from solid waste. It would have been obvious to one of ordinary skill in the art at the time the invention was made to recovery mercury from a source of mercury such as solid waste material since metals are being extracted in both cases.

With respect to Claims 13 to 21 the microwave frequency is regarded as well within the skill of the art because it is a result effective variable which results in the optimum recovery of mercury. In re Boesch 205 USPQ 215

Art Unit: 1742

With respect to Claim 33 the patent to Huang et al discloses a high powered microwave furnace as shown in FIG. 2 which will function as claimed.

Figure 2

Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tranquilla (US 6,074,533). Tranquilla discloses an apparatus see FIG.7 which will function as claimed.

Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tranquilla (US 5,82,133). Tranquilla disclose an apparatus see FIG 1 which function as claimed.
